

Result Evaluation Dashboard

Validation evidence from final-report/evidence/large_scale_query_intelligence_eval.json plus the 32-case fuzz matrix.

Total cases

10,000

query-style inputs

Finance / OOD

6,236

finance; 3,764 out-of-scope

Languages

5,865 zh

4,135 English queries

Retrieval

0.966

Recall@10 over 1,397 queries

Fuzz matrix

32/32

361 contract checks passed

Large-scale score profile

Interpretation controls

1. The 10,000-case set filters article-length rows and keeps chatbot-style queries.
2. Public and generated examples cover finance, English, OOD, macro, and retrieval cases.
3. Remaining limitation is reported: clarification recall is 0.75 against a 0.90 target.
